Beefsteak Tomatoes

- Azoychka
- Beefmaster
- Beefsteak
- Big Beef
- Big Rainbow
- Black Krim
- Caspian Pink
- Cherokee Purple
- German Johnson
- Mortgage Lifter
- Nepal

No image available at this time

Azoychka

Beefsteak

Color: Yellow-orange

Days to Maturity: 70

Indeterminate

Open Pollinated

- Early beefsteak type. Gorgeous 3-5" round oblate yellow fruit. Impressive flavor with slightly acidic and fruity tang. Production does taper off through-out the season.

Beefsteak

Color: Red

Days to Maturity: 80

Indeterminate

Hybrid

- Popular beefsteak-type tomato that is solid and meaty. Produces heavy yields with minimal cracking and splitting. Some disease resistance. Five to six foot tall plants will require staking or caging.

Beefmaster

Beefsteak

-  Beefsteak
-  Color: Red
-  Days to Maturity: 80
-  Indeterminate
-  Open Pollinated

- Old-fashioned heirloom beefsteak tomato. The large fruits are meaty and juicy and are perfect for slicing. A heavy producer on plants that can reach 8 feet. Staking is a necessity. Some disease resistance.

-  Beefsteak
-  Color: Red
-  Days to Maturity: 70
-  Indeterminate
-  Hybrid

- A large beefsteak with earlier maturity than most other beefsteaks. A great slicing tomato that produces all season on large 8 ft tall plants. Staking is a must. Good disease resistance. A 1994 AAS winner.

Big Beef

No image available at this time

Big Rainbow

Beefsteak

Color: Yellow-red

Days to Maturity: 82

Indeterminate

Open Pollinated

- An heirloom beefsteak that is colorful as well as a rich and intense flavor. The fruits ripen to a rich gold with red striping on massive plants that will require staking. Resistant to many tomato diseases.

Black Krim

Beefsteak

Color: Deep maroon

Days to Maturity: 80

Indeterminate

Open Pollinated

- A deep maroon/brown tomato with green shoulders. These beefsteaks have a rich, smoky flavor and are perfect for slicing and fresh eating. Vigorous vines with high yields reach a height of 5-7 feet. From the Crimea region of Europe.

Caspian Pink

-  Beefsteak
-  Color: Pink
-  Days to Maturity: 80
-  Indeterminate
-  Open Pollinated

- Pinkish-red heirloom beefsteak from the Black Sea region. Outstanding flavor, making it perfect for slicing and salads. Good for cooler climates.

Cherokee Purple

-  Beefsteak
-  Color: Purple-black
-  Days to Maturity: 80
-  Indeterminate
-  Open Pollinated

- Large beefsteak style fruits have a pinkish-red color with purple shoulder. The taste is rich and sweet. An heirloom from the Cherokee Nation.

German Johnson

Beefsteak

Color: Pink

Days to Maturity: 78

Indeterminate

Open Pollinated

- A slightly earlier beefsteak with high yields. The fruits are medium sized and uniform with mild flavor and meaty. An easy to grow tall plant that will require staking.

Beefsteak

Color: Pink

Days to Maturity: 85

Indeterminate

Open Pollinated

- This heirloom beefsteak tomato is very productive and disease resistant. The large fruits are slightly flattened, meaty and juicy.

Mortgage Lifter

Nepal

Beefsteak

Color: Red

Days to Maturity: 78

Indeterminate

Open Pollinated

- A medium to large size tomato that turns bright red when ripe. The fruits are meaty, tasty and juicy. Great for canning or processing. Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

Cherry Tomatoes (including Grapes and Pears).

- Black Cherry
- Blush
- Cherry Falls
- Grape
- Indigo Rose
- Juliet
- Large Cherry
- Midnight Snack
- Patio Choice Yellow
- Sun Gold
- Sunrise Bumble Bee
- Sun Sugar
- Supersweet 100
- Sweet Million
- Sweetie
- Yellow Pear

Black Cherry

-  Cherry/ Pear/ Grape
-  Color: Deep Purple
-  Days to Maturity: 64
-  Indeterminate
-  Open Pollinated

- A dusky purple cherry tomato that grows on vigorous large plants. The flavor is fruity, balanced and rich. Abundant yield. Disease resistant.

Blush

-  herry/ Pear/ Grape
-  Color: Yellow
-  Days to Maturity: 70
-  Indeterminate
-  Open Pollinated

- Bright yellow snacking tomato with red stripes developing on the blossom end. Extremely productive with a sweet and fruity taste. Tolerant of tough growing conditions. Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

Cherry/ Pear/ Grape

Color: Red

Days to Maturity: 55

Determinate

Hybrid

- Cherry tomato on compact plants that are great for hanging baskets and containers. Abundant early producer of red, juicy fruits. Good disease resistance.

No image available at this time

Cherry Falls

Grape

Cherry/ Pear/ Grape

Color: Red

Days to Maturity: 60

Indeterminate

Open Pollinated

- Grape tomato. This variety is perfect for snacking! There are often twelve to sixteen fruit per cluster. Disease and crack resistant

Cherry/ Pear/ Grape

Color: Blue black with red

Days to Maturity: 80

Indeterminate

Open Pollinated

- This has blue skin where exposed to sunshine! The remainder of the tomato is a deep red when mature Has a high level of anthocyanin, which is an antioxidant found in blueberries. Wonderful tomato flavor!

Indigo Rose

Large Cherry

Cherry/ Pear/ Grape

Color: Orange

Days to Maturity: 59

Determinate

Open Pollinated

- Very productive red cherry tomato that is larger than most cherries. The sweet fruits are perfect for salads and fresh eating as well as preserves.

Midnight Snack

Cherry/ Pear/ Grape

Color: Red with purple shoulders

Days to Maturity: 65

Indeterminate

Hybrid

- An unusual cherry that ripens to red with purply-black shoulders. Well-balanced flavor with a good dose of antioxidants. Great for snacking! Vigorous vines produce high yields throughout the season. A 2017 AAS winner.

Cherry/ Pear/ Grape

Color: Yellow

Days to Maturity: 50

Determinate

Hybrid

- A compact plant that is good for containers and small spaces. Yellow cherry tomatoes are sweet and abundant. Performs well in heat and humidity. Excellent disease resistance. A 2017 AAS winner.

Patio Choice Yellow

Cherry/ Pear/ Grape

Color: Orange

Days to Maturity: 57

Indeterminate

Hybrid

- A tangerine-gold cherry that is very sweet and juicy when ripe. The fruits are early yielding and will continue through out the season. Vigorous vines produces fruits in large clusters. Some disease resistance.

Sun Gold

Cherry/ Pear/ Grape

Color: Yellow- Red

Days to Maturity: 70

Indeterminate

Open Pollinated

- A cherry tomato that is a delightful combination of yellow and red. The fruits are small but filled with tremendously sweet flavor. Can be grown in a container but will require some support. Part of the Artisan(TM) collection.

Sunrise Bumble Bee

Sun Sugar

-  Cherry/ Pear/ Grape
-  Color: Orange
-  Days to Maturity: 62
-  Indeterminate
-  Hybrid

- A cherry that turns from green to yellow to orange as it ripens. Very sweet and highly productive. Excellent for fresh eating or salads. A good source of Vitamin A. Crack resistant while maintaining a thin skin.

-  Cherry/ Pear/ Grape
-  Color: Red
-  Days to Maturity: 60
-  Indeterminate
-  Hybrid

- A sweet, red cherry with prolific yields. Produces large clusters through out the growing season. Vines require staking. Some disease resistance.

No image available at this time

Supersweet 100

Sweet Million

-  Cherry/ Pear/ Grape
-  Color: Red
-  Days to Maturity: 60
-  Indeterminate
-  Hybrid

- A super sweet dark red cherry with incredibly high yields. The tomatoes are produced on long clusters that can contain 50 to 100 cherries. Great disease resistance.

-  Cherry/ Pear/ Grape
-  Color: Red
-  Days to Maturity: 65
-  Indeterminate
-  Open Pollinated

- Red cherry with a high sugar content. Great for juicing and preserving as well as fresh eating. Stores well and is somewhat tolerant of cooler conditions.

Sweetie

Yellow Pear

-  Cherry/ Pear/ Grape
-  Color: Yellow
-  Days to Maturity: 85
-  Indeterminate
-  Open Pollinated

- Yellow pear-shaped tomato that is slightly tangy. Great for salads and preserves. Vigorous heirloom with high yields.

Sauce Tomatoes (including Paste and Roma).

- Amish Paste
- Opalka
- Prairie Fire
- Roma
- Super San Marzano

Sauce/Paste/Roma

Color: Red

Days to Maturity: 85

Indeterminate

Open Pollinated

- Giant, blocky, meaty Roma style tomato. Perfect for paste and canning as well as fresh eating. Few seeds and sweet flavor make it the classic heirloom paste tomato.

Amish Paste

Sauce/Paste/Roma

Color: Red

Days to Maturity: 80

Indeterminate

Open Pollinated

- A large, red paste tomato that reaches up to 6 inches in length. Extremely meaty with few seeds makes it great for processing and canning. An heirloom from Poland.

No image available at this time

Opalka

Sauce/Paste/Roma

Color: Orange- red

Days to Maturity: 54

Determinate

Open Pollinated

- Lush, compact plants produce large 3" 3-4oz fruits that are orange-red with subtle gold stripes. Extremely sweet and richly flavored. Originally a cross between Sub-Arctic and a larger beefsteak. Somewhat tolerant of cooler temperatures.

No image available at this time

Prairie Fire

Roma

Sauce/Paste/Roma

Color: Red

Days to Maturity: 75

Determinate

Open Pollinated

- The classic tomato for canning and saucing. Meaty and thick-walled with few seeds. Heavy producer with some disease resistance.

Sauce/Paste/Roma

Color: Red

Days to Maturity: 80

Indeterminate

Open Pollinated

- Italian heirloom sauce tomato. The large fruits are juicy and meaty with superb flavor. The plants are vigorous and produce all season. Some disease resistance.

Better Boy

Slicer

Color: Red

Days to Maturity: 75

Indeterminate

Hybrid

- Large slicing tomato that is red in color and flavorful in taste. Adaptable to just about any climate with excellent disease resistance. Prolific producer from mid season to frost.

Slicer

Color: Purple- Black

Days to Maturity: 80

Indeterminate

Open Pollinated

- A deep dark blue-purple tomato with red flesh. Tasty and delicious large slicer that stores well at room temperature.

Black Beauty

No image available at this time

Black Sea Man

Slicer

Color: Brown- pink

Days to Maturity: 75

Determinate

Open Pollinated

- A rich mahogany colored tomato with green shoulders. The taste is rich and intense. The small size of the plant makes it ideal for containers and patios. Great for sandwiches and salads. An heirloom from Russia.

Slicer

Color: Pink

Days to Maturity: 80

Indeterminate

Open Pollinated

- A popular heirloom tomato! A beautiful large slicer with superb flavor. Fruit can weigh up to 1 1/2 lbs. The quality is excellent, but this is not a high yielding variety.

Brandywine Pink

Brandywine Red

Slicer

Color: Red

Days to Maturity: 90

Indeterminate

Open Pollinated

- This tomato's flavor is excellent and has low acidity. Its fruit typically weigh in around 1 lb. Plants get large and will need to be staked. Eat as a slicer or straight from the vine!

Slicer

Color: Reddish-orange

Days to Maturity: 75

Determinate

Open Pollinated

- A really beautiful and uniform slicer, developed her in Colorado! Burrell Seed Company had its home in the Rocky Ford area. Well suited for our region, this tomato has excellent balanced flavor

No image available at this time

Burrell's Special

No image available at this time

Carmello

Slicer

Color: Red

Days to Maturity: 75

Indeterminate

Hybrid

- While a hybrid- this is a French bred variety for superior fresh eating. Great crack and disease resistance. Well balanced in sweetness and acidity. Vines are strong and produce heavy, uniform clusters of fruit.

Slicer

Color: Red

Days to Maturity: 70

Semi- determinate

Hybrid

- Celebrity tomato plants produce an robust amount of smooth, round, and bright red fruit. Tomatoes weigh 8 ounces. Highly disease and crack resistant. This is a wise choice for gardeners seeking to reduce their use of chemical pesticides.

Celebrity Plus

No image available at this time

Chocolate Lightning

Slicer

Color: Dark rust with green stripes

Days to Maturity: 80

Determinate

Hybrid

- A luscious dwarf slicer tomato! Rich flavor, similar to other dark tomatoes. Typically produces a 4-8 oz size tomato. A wonderful tomato for a container garden or for those gardeners who are short on space.

No image available at this time

Crimson Sprinter

Slicer

Color: Red

Days to Maturity: 65

Semi-determinate

Open Pollinated

- Brilliant candy-apple red, large, round tomatoes in abundance on strong vines. Early harvest in cool weather conditions. High lycopene content. 8-12 oz fruits.

Beefsteak

Color: Pink with green stripes

Days to Maturity: 80

Indeterminate

Hybrid

- A dwarf plant that puts on beautiful deep magenta beefsteaks! Flavor that is well-balanced; slightly sweet and tangy. Plant's stems are very thick and strong, may require only minimal staking. Flavor is extremely rich.

No image available at this time

Dwarf Metallica

Beefsteak

Color: Orange-black shoulders

Days to Maturity: 65

Indeterminate

Hybrid

- A product of the Dwarf Tomato Project, these plants are relatively compact (3'). Also an extremely early producer for a large slicer. Said to have a delicious, smoky flavor. Also heat tolerant.

No image available at this time

Dwarf Uluru Ochre

Early Girl

Slicer

Color: Red

Days to Maturity: 60

Indeterminate

Hybrid

- Early Girl tomatoes have won over many gardeners with an early onset of fruit. This tomato will continue to produce through the season, until frost. Tomato is meaty, aromatic, and exceptionally flavorful.

Slicer

Color: Deep Red Orange

Days to Maturity: 67

Indeterminate

Hybrid

- Another beautiful dwarf tomato! This is similar to other dark tomatoes in flavor, slightly smokey and rich in flavor! Medium large tomatoes will prolifically grace this tomato plant!

No image available at this time

Fred's Tie- Dye

Slicer

Color: Pinkish red

Days to Maturity: 55

Indeterminate

Open Pollinated

- Named for the time these ripen. If you plant these tomato plants in early May (watch your frost dates!), you may have ripening tomatoes by July 4th. Fruit is round, 2 to 3" and pink.

No image available at this time

Glasnost

Slicer

Color: Pinkish Red

Days to Maturity: 55

Indeterminate

Open Pollinated

- Named for the time these ripen. If you plant these tomato plants in early May (watch your frost dates!), you may have ripening tomatoes by July 4th. Fruit is round, 2 to 3" and pink.

Independence Day

No image available at this time

Ispolin

Slicer

Color: Pink

Days to Maturity: 70

Indeterminate

Open Pollinated

- Truly a giant from Siberia. Spectacular huge round pink 1-2lb fruits can be expected from vines that reach 7'.

Slicer

Color: Purple- Black

Days to Maturity: 81

Indeterminate

Open Pollinated

- A pear-shaped fruit that has green-streaked shoulders, moving to a deep maroon and then to a dark black base. Interior is meaty, flavor is complex and rich. Crack resistant. Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

Japanese Black Trifele

Jet Star

Slicer

Color: Red

Days to Maturity: 70

Indeterminate

Hybrid

- Jet star is early maturing and high yielding. Its fruits are large and ripen evenly all the way through. Fruit is mild- and has low acidity. Plant is compact. Resistant to disease and cracks. Excellent choice for commercial or green house growing.

Slicer

Color: Golden Orange

Days to Maturity: 72

Indeterminate

Open Pollinated

- A low-acid tomato that makes excellent tomato juice, sauce, and salsa. Few seeds, and a meaty interior also make Jubilee an excellent slicing tomato. Fruit are about 3 inches around. Plant is high-yielding- make sure to stake. A 1943 AAS winner.

Jubilee

This page left intentionally blank, to build suspense.
You are only half way through the slicers! :)

Slicer

Color: Red

Days to Maturity: 75

Indeterminate

Open Pollinated

- Burpee original. Proven excellent storage tomato. Rather compact vines produce 6 oz. fruits. Pick when skins turn light gold and store all winter on open shelves at 60-70 degrees.

- ggg

Slicer

Color: Red

Days to Maturity: 60

Indeterminate

Open Pollinated

- A Russian heirloom. Plant is cold tolerant. A very early slicer tomato! Tomatoes have a robust flavor and typically weigh around 4-6 oz.

No image available at this time

Moskvich

No image available at this time

Northern Light

Slicer

Color: Red

Days to Maturity: 55

Determinate

Open Pollinated

- Extremely early for a slicer. Established originally in Montana. Very adaptable to a variety of climate surprises! Compact, 18" plant that produces high yields of flavorful 2-3 inch tomatoes!

Slicer

Color: Yellow

Days to Maturity: 75

Indeterminate

Open Pollinated

- Bright-orange, perfectly-round rather large 5-6oz. tomatoes on compact. 3-4' tall plants. Nice acid/sweet balance.

No image available at this time

Olga's Yellow Chicken

Patio

Slicer

Color: Red

Days to Maturity: 70

Determinate

Hybrid

- This variety produces tomatoes on a compact plant- ideal for small gardens or container growing. Tomatoes range from 3-4 oz. Plant is a high producer! Some plants produce 50 tomatoes within a 8 week harvest window! Resistant to disease.

Slicer

Color: Yellow- Red

Days to Maturity: 85

Indeterminate

Open Pollinated

- A tomato that produces beautiful 1-2lb fruits. Tomatoes are yellow with red marbling, and have a fruity sweet flavor. Tomato has few seeds and is very meaty. Excellent for eating fresh!

Pineapple

Pink Berkeley Tie-Dye

Slicer

Color: Dark pink with green stripes

Days to Maturity: 70

Indeterminate

Open Pollinated

- Surprisingly compact plants produce fruit (8-12 oz) with an outstanding complex tomato flavor. In farmer's market taste tests, this tomato outshines the popular Cherokee Purple tomato. Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

Slicer

Color: Red with green stripes

Days to Maturity: 70

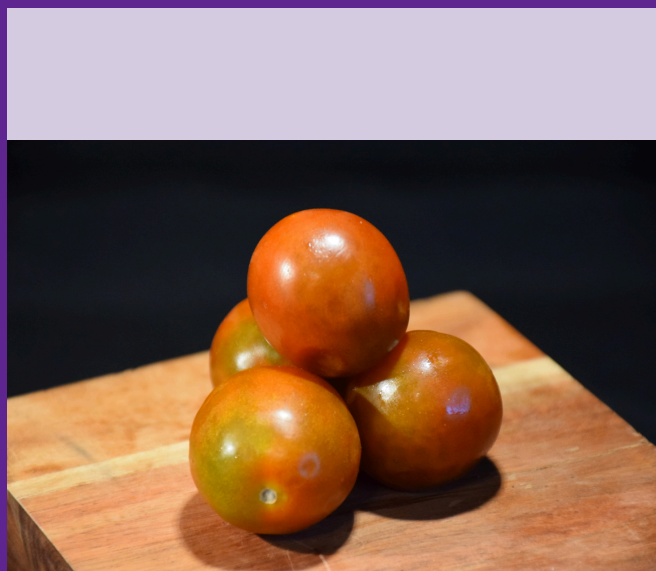

Indeterminate

Open Pollinated

- Not the cherry variety- this is a small slicer variety, weighing in at 20-25gm. Bred for vigor despite tough growing conditions. Unique visually, with purple and metallic green stripes. Fruits are meaty and sweet. Great as a snack while gardening! Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

Purple Bumble Bee

Rutgers

Slicer

Color: Red

Days to Maturity: 78

Determinate

Open Pollinated

- A long time heirloom and a favorite of many gardeners! Plant has strong determinate vines, and produce a large initial crop followed by several subsequent harvests. Resistant to cracking and disease. Fruit has excellent flavor as well.

Slicer

Color: Red

Days to Maturity: 57

Determinate

Open Pollinated

- Russian heirloom. Perfect red tomato for fresh eating, or juicing and canning. The 4-6 oz fruit have a great, rich flavor. This plant sets on fruit successfully in high altitudes- a great pick for our local region!

No image available at this time

Sasha's Altai

Slicer

Color: Red

Days to Maturity: 58

Determinate

Open Pollinated

- Finely divided, almost carrot-like leaves on distinctive, tidy 2' plants. Surprising amounts of slightly-flattened 2-3 1/2" red fruits that are delicious. Russian flavor.

Silvery Fir Tree

No image available at this time

Sioux

Slicer

Color: Red

Days to Maturity: 71

Semi-determinate

Open pollinated

- An excellent choice for regions that are hot and dry. Great for canning, sauces, and salsas. Fruit averages about 4 oz, and has an excellent tart flavor. High yielding, and crack resistant.

Slicer

Color: Red- Yellow

Days to Maturity: 78

Indeterminate

Open Pollinated

- A complex and fruity flavor is found in this yellow with red marbled tomato. Meaty and excellent for slicing. Plants will need staking, as they get quite large. Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

Striped German

Flamme

Small Fruit (larger than a cherry tomato)

Color: Orange

Days to Maturity: 75

Indeterminate

Open Pollinated

No image available at this time

Glacier

Small Fruit (larger than a cherry tomato)

Color: Red-orange

Days to Maturity: 56

Semi- determinate

Open Pollinated

- Produces earlier in cooler temperatures than other varieties. A smaller slicer, typically 2 inches in diameter. Fruit is sweet. A compact plant that is about 2 ½ feet tall, 3 ½ feet across.

Small Fruit (larger than a cherry tomato)

Color: Red with green stripes

Days to Maturity: 70

Indeterminate

Open Pollinated

- Beautiful enlarged "grape" tomatoes. Jewel-toned shades of green, blush and hints of gold. Flavor is nuanced: tangy, sweet with tropical undertones and a slight acidity. Bred to perform well in tough conditions.

Lucky Tiger

Unique Variety.

- Chiapas Wild
- Honey Pearl
- Purple Tomatillo
- Tomatillo Pancho

No image available at this time

Chiapas Wild

Unique variety

Color: Red

Days to Maturity: 69

Indeterminate

Open Pollinated

- Chiapas has the same genus as other tomatoes, but not the same species. This equates to them having superior disease resistance! Highly productive as well. Flavor is very sweet- everyone will love this tomato! A sprawling plant- make sure to cage or stake.

No image available at this time

Honey Pearl

Unique variety

Color: Pale gold

Days to Maturity: 90

Indeterminate

Open Pollinated

- Honey Pearl has the same genus as other tomatoes, but not the same species. This equates to them having superior disease resistance! Extremely prolific and flavorful marble-sized tomatoes. Sweet and spicy. Vigorous plant- make sure to stake. Fruit stores for a long time.

Unique variety

Color: Purple

Days to Maturity: 75

Determinate

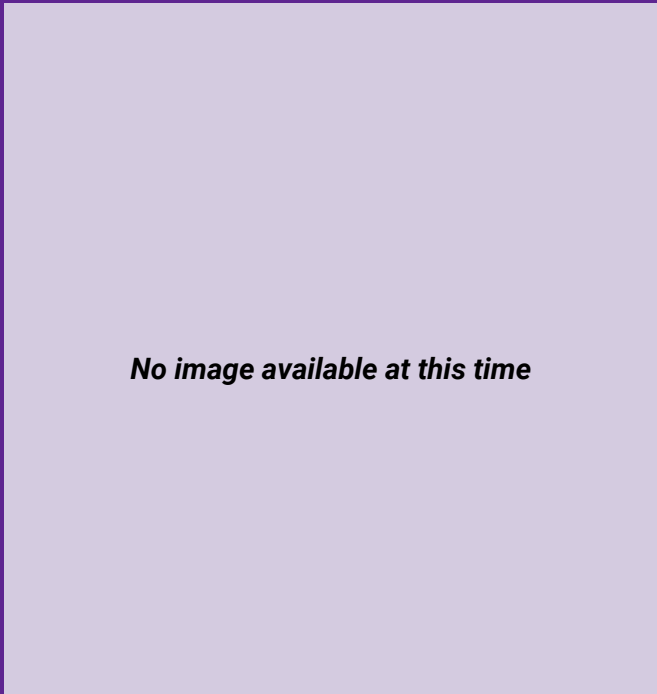

Open Pollinated

- In the nightshade family, like tomatoes, the Purple Tomatillo is perfect for fresh salsas & green chili. This purple variety is high in antioxidants as well. Plant will need staking. Fruit is encased in a papery husk and look like paper lanterns. Tomatillos require cross pollination- buy two!

No image available at this time

Purple Tomatillo

No image available at this time

Tomatillo Pancho

Unique variety

Color: Green

Days to Maturity: 60

Determinate

Hybrid

- In the nightshade family, like tomatoes, the Tomatillo is perfect for fresh salsas & green chili. This is a hybrid variety with earlier production. Minimal staking is required. Pancho has large-sized tomatillos which are citrusy- sweet in flavor. Tomatillos require cross pollination- buy two!
