Beefsteak Tomatoes

- Beefsteak
- Big Beef
- Big Rainbow
- Black Krim
- Caspian Pink
- Cherokee Purple
- German Johnson
- Dr. Wyche's Yellow
- Mortgage Lifter

Beefsteak

-  Beefsteak
-  Color: Red
-  Days to Maturity: 80
-  Indeterminate
-  Open-pollinated

- Old-fashioned heirloom beefsteak tomato. The large fruits are meaty and juicy and are perfect for slicing. A heavy producer on plants that can reach 8 feet. Staking is a necessity. Some disease resistance.

-  Beefsteak
-  Color: Red
-  Days to Maturity: 70
-  Indeterminate
-  Hybrid

- A large beefsteak with earlier maturity than most other beefsteaks. A great slicing tomato that produces all season on large 8 ft tall plants. Staking is a must. Good disease resistance. A 1994 AAS winner.

Big Beef

Sorry, no
pictures yet!

Big Rainbow

-  Beefsteak
-  Color: Yellow-red
-  Days to Maturity: 82
-  Indeterminate
-  Open-pollinated

- An heirloom beefsteak that is colorful as well as a rich and intense flavor. The fruits ripen to a rich gold with red striping on massive plants that will require staking. Resistant to many tomato diseases.

Black Krim

-  Beefsteak
-  Color: Deep maroon
-  Days to Maturity: 80
-  Indeterminate
-  Open-pollinated

- A deep maroon/brown tomato with green shoulders. These beefsteaks have a rich, smoky flavor and are perfect for slicing and fresh eating. Vigorous vines with high yields reach a height of 5-7 feet. From the Crimea region of Europe.

Caspian Pink

-  Beefsteak
-  Color: Pink
-  Days to Maturity: 80
-  Indeterminate
-  Open-pollinated

- Pinkish-red heirloom beefsteak from the Black Sea region. Outstanding flavor, making it perfect for slicing and salads. Good for cooler climates.

Cherokee Purple

-  Beefsteak
-  Color: Purple-black
-  Days to Maturity: 80
-  Indeterminate
-  Open-pollinated

- Large beefsteak style fruits have a pinkish-red color with purple shoulder. The taste is rich and sweet. An heirloom from the Cherokee Nation.

Sorry, no
pictures yet!

Dr. Wyche's Yellow

-  Beefsteak
-  Color: Yellow Orange
-  Days to Maturity: 80
-  Indeterminate
-  Open-pollinated

- A beautiful and bright colored tomato! Fruit can reach 1lbs in size and have a smooth texture. Flavor is tropical and sweet. A fun fact, these tomatoes were created by co-owner of Cole Brothers Circus, Dr, John Wyche, and he fertilized these tomatoes with elephant manure (rareseeds.com)! Cool, right?

German Johnson

-  Beefsteak
-  Color: Pink
-  Days to Maturity: 78
-  Indeterminate
-  Open-pollinated

- A slightly earlier beefsteak with high yields. The fruits are medium sized and uniform with mild flavor and meaty. An easy to grow tall plant that will require staking.

Beefsteak

Color: Pink

Days to Maturity: 85

Indeterminate

Open-pollinated

- This heirloom beefsteak tomato is very productive and disease resistant. The large fruits are slightly flattened, meaty and juicy.

Mortgage Lifter

Cherry Tomatoes (including Grapes and Pears)

- Black Cherry
- Blush
- Cherry Falls
- Grape
- Indigo Rose
- Midnight Snack
- Patio Choice Yellow
- Sun Gold
- Sunrise Bumble Bee
- Sun Sugar
- Supersweet 100
- Sweet Million
- Yellow Pear

Black Cherry

-  Cherry/ Pear/ Grape
-  Color: Deep Purple
-  Days to Maturity: 64
-  Indeterminate
-  Open-pollinated

- A dusky purple cherry tomato that grows on vigorous large plants. The flavor is fruity, balanced and rich. Abundant yield. Disease resistant.

Blush

-  Cherry/ Pear/ Grape
-  Color: Yellow
-  Days to Maturity: 70
-  Indeterminate
-  Open-pollinated

- Bright yellow snacking tomato with red stripes developing on the blossom end. Extremely productive with a sweet and fruity taste. Tolerant of tough growing conditions. Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

 Cherry/ Pear/ Grape

 Color: Red

 Days to Maturity: 55

 Determinate

 Hybrid

- Cherry tomato on compact plants that are great for hanging baskets and containers. Abundant early producer of red, juicy fruits. Good disease resistance.

**Sorry, no
pictures yet!**

Cherry Falls

Grape

 Cherry/ Pear/ Grape

 Color: Red

 Days to Maturity: 60

 Indeterminate

 Open-pollinated

- Grape tomato. This variety is perfect for snacking! There are often twelve to sixteen fruit per cluster. Disease and crack resistant.

Cherry/ Pear/ Grape

Color: Blue black with red

Days to Maturity: 80

Indeterminate

Open-pollinated

Indigo Rose

- This has blue skin where exposed to sunshine! The remainder of the tomato is a deep red when mature Has a high level of anthocyanin, which is an antioxidant found in blueberries. Wonderful tomato flavor!

Midnight Snack

Cherry/ Pear/ Grape

Color: Red with purple shoulders

Days to Maturity: 65

Indeterminate

Hybrid

- An unusual cherry that ripens to red with purply-black shoulders. Well-balanced flavor with a good dose of antioxidants. Great for snacking! Vigorous vines produce high yields throughout the season. A 2017 AAS winner.

Cherry/ Pear/ Grape

Color: Yellow

Days to Maturity: 50

Determinate

Hybrid

- A compact plant that is good for containers and small spaces. Yellow cherry tomatoes are sweet and abundant. Performs well in heat and humidity. Excellent disease resistance. A 2017 AAS winner.

Patio Choice Yellow

Cherry/ Pear/ Grape

Color: Orange

Days to Maturity: 57

Indeterminate

Hybrid

- A tangerine-gold cherry that is very sweet and juicy when ripe. The fruits are early yielding and will continue through out the season. Vigorous vines produces fruits in large clusters. Some disease resistance.

Sun Gold

Cherry/ Pear/ Grape

Color: Yellow- Red

Days to Maturity: 70

Indeterminate

Open-pollinated

Sunrise Bumble Bee

- A cherry tomato that is a delightful combination of yellow and red. The fruits are small but filled with tremendously sweet flavor. Can be grown in a container but will require some support. Part of the Artisan(TM) collection.

Sun Sugar

Cherry/ Pear/ Grape

Color: Orange

Days to Maturity: 62

Indeterminate

Hybrid

- A cherry that turns from green to yellow to orange as it ripens. Very sweet and highly productive. Excellent for fresh eating or salads. A good source of Vitamin A. Crack resistant while maintaining a thin skin.

Cherry/ Pear/ Grape

Color: Red

Days to Maturity: 60

Indeterminate

Hybrid

- A sweet, red cherry with prolific yields. Produces large clusters through out the growing season. Vines require staking. Some disease resistance.

Sorry, no pictures yet!

Supersweet 100

Sweet Million

Cherry/ Pear/ Grape

Color: Red

Days to Maturity: 60

Indeterminate

Hybrid

- A super sweet dark red cherry with incredibly high yields. The tomatoes are produced on long clusters that can contain 50 to 100 cherries. Great disease resistance.

Cherry/ Pear/ Grape

Color: Red

Days to Maturity: 65

Indeterminate

Open-pollinated

Sweetie

- Red cherry with a high sugar content. Great for juicing and preserving as well as fresh eating. Stores well and is somewhat tolerant of cooler conditions.

Yellow Pear

Cherry/ Pear/ Grape

Color: Yellow

Days to Maturity: 85

Indeterminate

Open-pollinated

- Yellow pear-shaped tomato that is slightly tangy. Great for salads and preserves. Vigorous heirloom with high yields.

Sauce Tomatoes (including Paste and Roma)

- Dwarf Sneaky Sauce
- Little Napoli
- Pompeii
- Prairie Fire
- Roma
- Super San Marzano

 Sauce/Paste/Roma

 Color: Red

 Days to Maturity: 75

 Indeterminate

 Open-pollinated

- Hailing from the “sneaky” tomato line, these heart-like tomatoes produce a meaty sauce! The dwarf sneaky is likewise known to be a prolific producer and is okay for small space situations!

**Sorry, no
pictures yet!**

Dwarf Sneaky Sauce

 Sauce/Paste/Roma

 Color: Red

 Days to Maturity: 60-65

 Determinate

 Open-pollinated

- Beautiful, bright red, pear-shaped tomatoes come from the Little Napoli! These tomatoes flourish in containers and make excellent sauce and salsa. Yummy!

**Sorry, no
pictures yet!**

Little Napoli

 Sauce/Paste/Roma

 Color: Red

 Days to Maturity: 85

 Indeterminate

 Open-pollinated

- Giant, blocky, meaty Roma style tomato. Perfect for paste and canning as well as fresh eating. Few seeds and sweet flavor make it the classic heirloom paste tomato.

Sorry, no
pictures yet!

Pompeii

 Sauce/Paste/Roma

 Color: Orange- red

 Days to Maturity: 54

 Determinate

 Open-pollinated

- Lush, compact plants produce large 3" 3-4oz fruits that are orange-red with subtle gold stripes. Extremely sweet and richly flavored. Originally a cross between Sub-Arctic and a larger beefsteak. Somewhat tolerant of cooler temperatures.

Sorry, no
pictures yet!

Prairie Fire

Roma

-  Sauce/Paste/Roma
-  Color: Red
-  Days to Maturity: 75
-  Determinate
-  Open-pollinated

- The classic tomato for canning and saucing. Meaty and thick-walled with few seeds. Heavy producer with some disease resistance.

-  Sauce/Paste/Roma
-  Color: Red
-  Days to Maturity: 80
-  Indeterminate
-  Open-pollinated

- Italian heirloom sauce tomato. The large fruits are juicy and meaty with superb flavor. The plants are vigorous and produce all season. Some disease resistance.

Super San Marzano

Slicers

- Better Boy

- Silvery Fir Tree
- Sioux
- Striped German
- Stupice
- Sub-Arctic Plenty
- Super Fantastic
- Tasmanian Chocolate
- Ultimate Opener
- Valencia

Better Boy

-  Slicer
-  Color: Red
-  Days to Maturity: 75
-  Indeterminate
-  Hybrid

- Large slicing tomato that is red in color and flavorful in taste. Adaptable to just about any climate with excellent disease resistance. Prolific producer from mid season to frost.

-  Slicer
-  Color: Pink & Green Striped
-  Days to Maturity: 60-75
-  Indeterminate
-  Open-pollinated

- A crazy colorful and large slicer! Inner flesh of the tomato is green, with pink and yellow stripes. The flavor can be just as complex as its colors too, ranging from sweet, tart, and even spicy! Make great salsa!

Berkley Tie-Dye

Slicer

Color: Purple- Black

Days to Maturity: 80

Indeterminate

Open-pollinated

Black Beauty

- A deep dark blue-purple tomato with red flesh. Tasty and delicious large slicer that stores well at room temperature.

Crimson Sprinter

Slicer

Color: Red

Days to Maturity: 65

Semi-determinate

Open-pollinated

- Brilliant candy-apple red, large, round tomatoes in abundance on strong vines. Early harvest in cool weather conditions. High lycopene content. 8-12 oz fruits.

Beefsteak

Color: Pink with green stripes

Days to Maturity: 80

Indeterminate

Hybrid

- A dwarf plant that puts on beautiful deep magenta beefsteaks! Flavor that is well-balanced; slightly sweet and tangy. Plant's stems are very thick and strong, may require only minimal staking. Flavor is extremely rich.

Sorry, no pictures yet!

Dwarf Metallica

Early Girl

Slicer

Color: Red

Days to Maturity: 60

Indeterminate

Hybrid

- Early Girl tomatoes have won over many gardeners with an early onset of fruit. This tomato will continue to produce through the season, until frost. Tomato is meaty, aromatic, and exceptionally flavorful.

Sorry, no
pictures yet!

Goliath

-  Slicer
-  Color: Red & Dark Pink
-  Days to Maturity: 85
-  Indeterminate
-  Hybrid

- A giant slicer! The Goliath has few seeds and has ribbed flesh. It likewise has semi-acid yet sweet flesh, making it a well balanced tomato taste wise.

Sorry, no
pictures yet!

Ispolin

-  Slicer
-  Color: Pink
-  Days to Maturity: 70
-  Indeterminate
-  Open-pollinated

- Truly a giant from Siberia. Spectacular huge round pink 1-2lb fruits can be expected from vines that reach 7'. The Isopolin has sweet, earthy fruit perfect for a tomato sandwich!

Slicer

Color: Purple- Black

Days to Maturity: 81

Indeterminate

Open-pollinated

- A pear-shaped fruit that has green-streaked shoulders, moving to a deep maroon and then to a dark black base. Interior is meaty, flavor is complex and rich. Crack resistant. Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

Japanese Black Trifele

Slicer

Color: Golden Orange

Days to Maturity: 72

Indeterminate

Open-pollinated

- A low-acid tomato that makes excellent tomato juice, sauce, and salsa. Few seeds, and a meaty interior also make Jubilee an excellent slicing tomato. Fruit are about 3 inches around. Plant is high-yielding- make sure to stake. A 1943 AAS winner.

Jubilee

Slicer

Color: Red

Days to Maturity: 75

Indeterminate

Open-pollinated

- Burpee original. Proven excellent storage tomato. Rather compact vines produce 6 oz. fruits. Pick when skins turn light gold and store all winter on open shelves at 60-70 degrees.

Sorry, no
pictures yet!

Long Keeper

Slicer

Color: Red

Days to Maturity: 60

Indeterminate

Open-pollinated

- A Russian heirloom. Plant is cold tolerant. A very early slicer tomato! Tomatoes have a robust flavor and typically weigh around 4-6 oz.

Sorry, no
pictures yet!

Moskvich

Sorry, no pictures yet!

Northern Light

-  Slicer
-  Color: Red
-  Days to Maturity: 55
-  Determinate
-  Open-pollinated

- Extremely early for a slicer. Established originally in Montana. Very adaptable to a variety of climate surprises! Compact, 18" plant that produces high yields of flavorful 2-3 inch tomatoes!

-  Slicer
-  Color: Yellow
-  Days to Maturity: 75
-  Indeterminate
-  Open-pollinated

- Bright-orange, perfectly-round rather large 5-6oz. tomatoes on compact. 3-4' tall plants. Nice acid/sweet balance.

Sorry, no pictures yet!

Olga's Yellow Chicken

Patio

-  Slicer
-  Color: Red
-  Days to Maturity: 70
-  Determinate
-  Hybrid

- This variety produces tomatoes on a compact plant- ideal for small gardens or container growing. Tomatoes range from 3-4 oz. Plant is a high producer! Some plants produce 50 tomatoes within a 8 week harvest window! Resistant to disease.

-  Slicer
-  Color: Yellow- Red
-  Days to Maturity: 85
-  Indeterminate
-  Open-pollinated

- A tomato that produces beautiful 1-2lb fruits. Tomatoes are yellow with red marbling, and have a fruity sweet flavor. Tomato has few seeds and is very meaty. Excellent for eating fresh!

Pineapple

Pink Berkeley Tie-Dye

Slicer

Color: Dark pink with green stripes

Days to Maturity: 70

Indeterminate

Open-pollinated

- Surprisingly compact plants produce fruit (8-12 oz) with an outstanding complex tomato flavor. In farmer's market taste tests, this tomato outshines the popular Cherokee Purple tomato. Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

Slicer

Color: Red with green stripes

Days to Maturity: 70

Indeterminate

Open-pollinated

- Not the cherry variety- this is a small slicer variety, weighing in at 20-25gm. Bred for vigor despite tough growing conditions. Unique visually, with purple and metallic green stripes. Fruits are meaty and sweet. Great as a snack while gardening! Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

Purple Bumble Bee

Rutgers

-  Slicer
-  Color: Red
-  Days to Maturity: 78
-  Determinate
-  Open-pollinated

- A long time heirloom and a favorite of many gardeners! Plant has strong determinate vines, and produce a large initial crop followed by several subsequent harvests. Resistant to cracking and disease. Fruit has excellent flavor as well.

-  Slicer
-  Color: Red
-  Days to Maturity: 57
-  Determinate
-  Open-pollinated

- Russian heirloom. Perfect red tomato for fresh eating, or juicing and canning. The 4-6 oz fruit have a great, rich flavor. This plant sets on fruit successfully in high altitudes- a great pick for our local region!

Sorry, no pictures yet!

Sasha's Altai

Slicer

Color: Red

Days to Maturity: 58

Determinate

Open-pollinated

- Finely divided, almost carrot-like leaves on distinctive, tidy 2' plants. Surprising amounts of slightly-flattened 2-3 1/2" red fruits that are delicious. Russian flavor.

Silvery Fir Tree

Sorry, no pictures yet!

Sioux

Slicer

Color: Red

Days to Maturity: 71

Semi-determinate

Open-pollinated

- An excellent choice for regions that are hot and dry. Great for canning, sauces, and salsas. Fruit averages about 4 oz and has an excellent tart flavor. High yielding and crack resistant.

Slicer

Color: Red- Yellow

Days to Maturity: 78

Indeterminate

Open-pollinated

Striped German

- A complex and fruity flavor is found in this yellow with red marbled tomato. Meaty and excellent for slicing. Plants will need staking, as they get quite large. Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

Sub-Artic Plenty

Slicer

Color: Red

Days to Maturity: 62

Determinate

Open-pollinated

- Cold-tolerant and early-ripening. Compact, extremely prolific plant produces numerous clusters of red, tasty, 2 oz. fruits.

Slicer

Color: Red

Days to Maturity: 70

Indeterminate

Hybrid

- An improved variation of the Fantastic tomato. Increased disease resistance. This plant will give you an abundant harvest, and you will love the meaty fruits that typically weigh 10 oz. A winner!

Super Fantastic

Slicer

Color: Deep Red

Days to Maturity: 80-85 Days

Semi-Indeterminate

Hybrid

- A small yet strong fruit producing tomato! Perfect for container gardens, yet don't let their small stature fool you. They grow juicy, big tomatoes that are perfect for slicing. Tasty too!

Tasmanian Chocolate

Slicer

Color: Red

Days to Maturity: 57

Indeterminate

Hybrid

- This tomato will produce blemish-free fruits that are larger than Early Girl. It also boasts wonderful flavor- sweet and juicy! The plants are vigorous and give high yields. Disease resistant.

Ultimate Opener

Slicer

Color: Orange

Days to Maturity: 72

Indeterminate

Open-Pollinated

- A bright and beautiful fruit to match its strong tomato flavor! And as a perk the Valencia packs a lot of meat in its little fruits, with few seeds to boot.

Valencia

Small Fruits

- 42 Days
- Black Prince
- Black Strawberry
- Bloody Butcher
- Early Doll
- Glacier
- Ida Gold
- Jaune Flamme
- Lucky Tiger

Small Fruit (larger than a cherry tomato)

Color: Red

Days to Maturity: 42

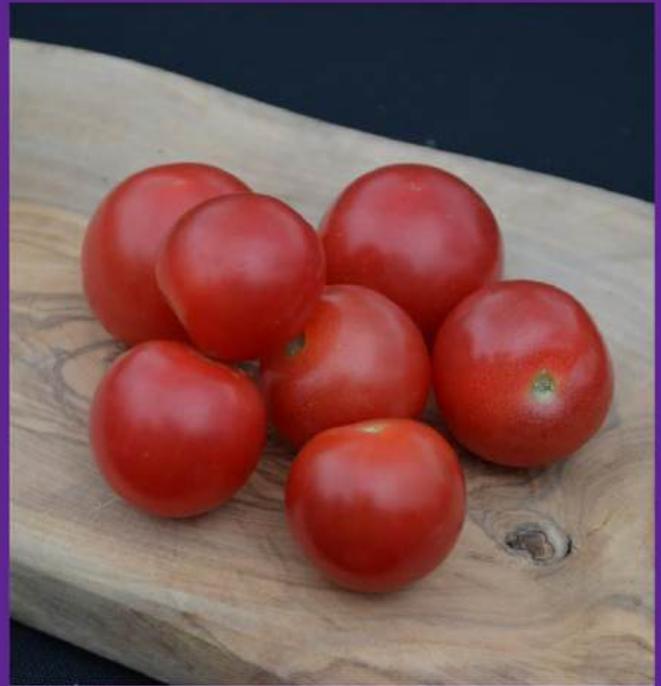

Determinate

Open-pollinated

- This may be the earliest tomato around! The plant produces smaller 1 oz. fruits that are bright red and have few seeds. A compact plant that is great for containers or small gardens!

42 days

Small Fruit (larger than a cherry tomato)

Color: Purple Black

Days to Maturity: 70

Indeterminate

Open-pollinated

- Another Siberian tomato. Does well in cooler climate. High yielding producing from 25 to 40 lbs per plant. Flavor is preferred by many chefs. Plant will get very large- make sure to stake. Photo Courtesy of Johnny's Selected Seeds, Johnnyseeds.com.

Black Prince

Small Fruit (larger than a cherry tomato)

Color: Marbled Black, Red, Gold, & Pink

Days to Maturity: 60

Indeterminate

Open-pollinated

- A delicious and sweet tomato! The black strawberry has a complex flavor profile, with hints of plum and grape. And they're visual beautiful too! A bowl full of these small fruit tomatoes looks like a clutch of shining gems.

Black Strawberry

Small Fruit (larger than a cherry tomato)

Color: Red

Days to Maturity: 55

Determinate

Hybrid

- While a very early variety, the Early Doll is not bland in flavor! Good producing variety 5 oz fruits. A great choice for a short growing season, and for someone who cannot wait for the first garden tomato!

Early Doll

Sorry, no
pictures yet!

Glacier

-  Small Fruit (larger than a cherry tomato)
-  Color: Red-orange
-  Days to Maturity: 56
-  Semi- determinate
-  Open-pollinated

- Produces earlier in cooler temperatures than other varieties. A smaller slicer, typically 2 inches in diameter. Fruit is sweet. A compact plant that is about 2 ½ feet tall, 3 ½ feet across.

Sorry, no
pictures yet!

Grushkova

-  Small Fruit (larger than a cherry tomato)
-  Color: Pink
-  Days to Maturity: 65
-  Determinate
-  Open Pollinated

- A Siberian tomato variety that produces small fruits! These fruits are egg-shaped and perfect for canning. Prolific production and very tasty too!

Sorry, no
pictures yet!

Ida Gold

-  Small Fruit
-  Color: Orange-Red
-  Days to Maturity: 60
-  Determinate
-  Open-pollinated

- A low-maintenance tomato that produces bright, golf ball sized fruit! The fruit are none stop and the ida gold is generally disease resistant!

Sorry, no
pictures yet!

Jaune Flammee

-  Small Fruit (larger than a cherry tomato)
-  Color: Apricot-Orange
-  Days to Maturity: 80
-  Indeterminate
-  Open-pollinated

- A small tomato with BIG flavor! The jaune flammee, translated to "yellow flame," has fruits with a perfectly balanced sweet and tart flavor. The fruit has a equally delightful color!

Small Fruit (larger than a cherry tomato)

Color: Red with green stripes

Days to Maturity: 70

Indeterminate

Open-pollinated

- Beautiful enlarged "grape" tomatoes. Jewel-toned shades of green, blush and hints of gold. Flavor is nuanced: tangy, sweet with tropical undertones and a slight acidity. Bred to perform well in tough conditions.

Lucky Tiger

Unique Variety

- Aunt Molly's Ground Cherry
- Honey Pearl
- Purple Tomatillo
- Tomatillo Verde

Sorry, no
pictures yet!

Aunt Molly's Ground Cherry

- Unique variety
- Color: Yellow
- Days to maturity: 65
- Determinate
- Open-pollinated

- A unique and tropical-tasting ground cherry! The fruit is enclosed in a papery husk, which falls to the ground when ripe. Perfect for preserves and pies!

- Unique variety
- Color: Purple
- Days to Maturity: 75
- Determinate
- Open-pollinated

- In the nightshade family, like tomatoes, the Purple Tomatillo is perfect for fresh salsas & green chili. This purple variety is high in antioxidants as well. Plant will need staking. Fruit is encased in a papery husk and look like paper lanterns. Tomatillos require cross pollination, so buy two!

Sorry, no
pictures yet!

Purple Tomatillo

 Unique variety

 Color: Purple

 Days to Maturity: 60-70

 Determinate

 Open-pollinated

- In the nightshade family, like tomatoes, Tomatillo Verde is perfect for fresh salsas & green chili. This variety has amazing flavor, tasting like a cross between a tomato, a pineapple, and a lemon. Fruit is encased in a papery husk and look like paper lanterns. Tomatillos require cross pollination, so buy two!

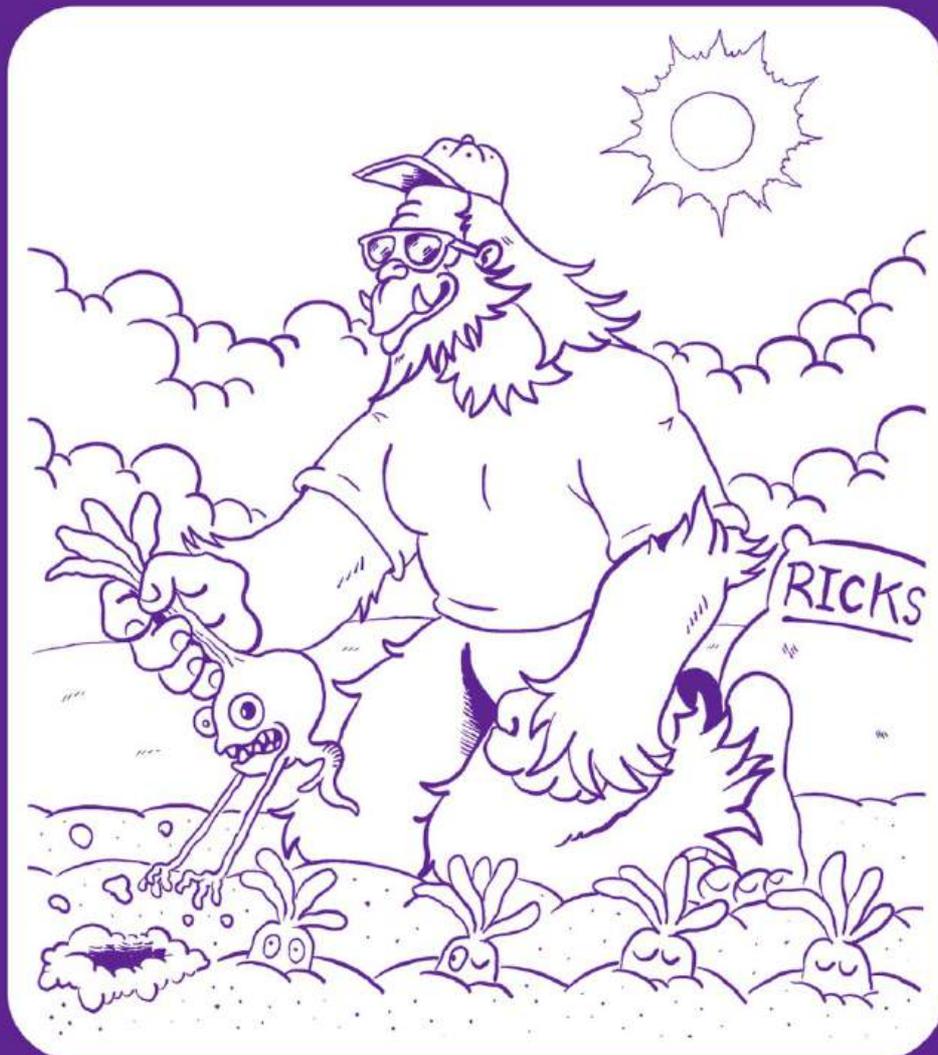

Sorry, no

- Santa Fe Grande
- Scotch Bonnet - Orange
- Serrano
- Shishito
- Sriracha
- Sweet Banana
- Tabasco
- Thai Dragon

Pepper

Scoville Scale: 500

Days to Maturity: 80

- A versatile, mild, meaty pepper with thick walls. Anaheim peppers are perfect for roasting and smoking as well as stuffing and drying.

Anaheim

Pepper

Scoville Scale: 0

Days to Maturity: 70

- Bell pepper that ripens to a chocolate brown. The fruits are crisp and juicy with thick walls. Produces early and are great for fresh eating, stuffing and sauces.

Bell - Chocolate Beauty

Pepper

Scoville Scale: 0

Days to Maturity: 75

Bell - Orange

- A bell pepper that starts out green and matures to a deep orange color. The large fruits have thick walls and a super sweet taste. High yielding.

Bell - Purple Beauty

Pepper

Scoville Scale: 0

Days to Maturity: 75

- Compact plant with high yields. The large fruits ripen to a deep purple that are delicious crisp and juicy. The thick walls are perfect for cooking or eating raw.

Bell - Yellow

Pepper

Scoville Scale: 0

Days to Maturity: 75

- Bell pepper with a bright yellow-golden color at maturity. The thick sweet flesh is perfect for fresh eating.

Pepper

Scoville Scale: 0

Days to Maturity: 75

- A big bell pepper that ripens to a deep red when left on the plant. Crisp and delicious! The Big Red delivers heavy yields and flavorful fruit throughout the summer.

Bell - Big Red

Bell - California Wonder

Pepper

Scoville Scale: 0

Days to Maturity: 70

Supposedly the best of its class in terms of bell peppers. Produces well-formed, juicy peppers. The peppers start out green, but the longer they stay on the plant the redder they become! Versatile in cooking!

Pepper

Scoville Scale: 0

Days to Maturity: 70

A beautiful and bright bell pepper! Pepper starts green then turns a sunny yellow as it ripens. Sweet, mild flavor with a lovely crunch. Freezes well!

Bell - Golden California Wonder

Carolina Reaper

Pepper

Scoville Scale: 1,500,000+

Days to Maturity: 90

- Extremely hot pepper which starts out green and turns a brilliant red. It is often grown as an ornamental due to the showy round fruits with a characteristic 'tail'. The peppers are used in sauces and are good for drying as well.

Pepper

Scoville Scale: 30,000-50,000

Days to Maturity: 75

- A zesty and hot pepper that grows to 6 inches long. The Cayenne is definitely hotter than jalapenos. These peppers are perfect for drying and stringing ristras!

Cayenne

Cubanella

Pepper

Scoville Scale: 100-1,000

Days to Maturity: 68

- Sweet pepper from the Caribbean. Starts out green and turns red. Excellent for frying or grilling. Great in pesto.

Early Jalapeno

Pepper

Scoville Scale: 2,500-8,000

Days to Maturity: 63

- Hot pepper with numerous uses. Very productive and seldom need staking. Compared to the common Jalapeno, these guys mature earlier! Great for the cold northern regions of the state.

Fresno Chili

Pepper

Scoville Scale: 2,500-10,000

Days to Maturity: 70

- Similar to the jalapeno but milder. When cooked, they have a smoky-sweet.

Pepper

Scoville Scale: 600000+

Days to Maturity: 120

- Extremely hot pepper with a fiery taste and crisp texture. Fruits start out as green and turn to a wrinkled red when mature. It is good for pickling, sauces and drying.

Ghost (Bhut Jolokia)

Pepper

Scoville Scale: 150,000-350,000

Days to Maturity: 90

- One of the hottest peppers on the Scoville Scale. These South American peppers have thin walls and a wrinkled, waxy surface. Use caution when handling as they can irritate the skin.

Habanero

Holy Mole

Pepper

Scoville Scale: 700-800

Days to Maturity: 70

- Hot pepper used to make mole sauce. These 7-9 inch long peppers have a nutty, tangy flavor. Can be harvested green or allowed to mature to a dark chocolate color. Vigorous plant with high yields.

Sorry, no
pictures yet!

Hot Banana

Pepper

Scoville Scale: 100-1,000

Days to Maturity: 72

- This pepper plant gives back! From high yields to heat intensity, the Hot Banana makes a great addition to a garden. Sometimes these peppers fruit early too. Resistant to bacterial leaf spot (Burpee.com).

Pepper

Scoville Scale: 5,000-10,000

Days to Maturity: 60

- Early producing hot pepper that resembles a banana pepper. Much hotter than a jalapeno.

Hungarian Hot Wax

Jalapeno

Pepper

Scoville Scale: 2,500-8,000

Days to Maturity: 80

One of the most popular peppers around! Jalapeno are peppers with great heat and numerous uses. Very productive and seldom need staking.

Mad Hatter - Bishop's
Crown

Pepper

Scoville Scale: 5,000

Days to Maturity: 85

- A South American variety with a unique shape. A mild, sweet citrusy flavor that be spicy on the seed end of the fruit. Easy to grow and vigorous with high yields. A 2017 AAS winner

Pepper

Scoville Scale: 500-2,500

Days to Maturity: 75

- Most peppers are mild but this variety can produce an occasional hot one. Can turn red if left long enough.

Padron

Pepper

Scoville Scale: 100-500

Days to Maturity: 75

- Hybrid pepperoncini developed to have a more uniform set and maturity. Mildly hot in terms of European breeds, nothing compared to South American and Asian peppers in spice level.

Pepperoncini

Poblano

Pepper

Scoville Scale: 1,000-2,000

Days to Maturity: 70

- A deep green pepper from Mexico with mild heat. Will turn red if left on the vine long enough. A staple of Mexican and Tex-Mex cuisines.

Pepper

Scoville Scale: 5,000

Days to Maturity: 75

- Developed in Pueblo, Colorado! These peppers have a thick skin that turns from green to red. Excellent for roasting.
